

BORDER CONTROL INTELLIGENCE

Advanced Solutions for Border Protection

CORE COMPETENCIES

- Hyper-accurate mobile tracking from any network
- Geofencing for proximity alerts
- Team location tracking (Blue Force)
- Automated intelligence to detect individuals traveling together or meeting
- Fuses data from location, forensics, OSINT, CCTV, and more

SS8 NETWORKS, INC.

HEADQUARTERS:

750 Tasman Drive,
Milpitas, CA 95035

UNITED KINGDOM OFFICE:

Cody Technology Park
Old Ively Road
Farnborough
Hampshire
GU14 0LX

CANADA OFFICE:

675 Cochrane Drive
East Tower
Markham, ON
L3R 0B8

CORPORATE WEBSITE:

www.SS8.com

WHY CHOOSE SS8 NETWORKS?

- A comprehensive approach to lawful and location intelligence with **over 25 years experience** working with intelligence agencies.
- Unparalleled **Expertise** in collecting data from cellular networks for location, forensics, and evidence.
- **2+ Billion** mobile devices monitored by our software daily.
- Our insights **Enhance Existing Surveillance** capabilities for greater efficiency and results.
- **Minimization/anonymization** available to protect privacy.

BENEFITS FOR BORDER CONTROL SECURITY

- Enable real-time interception with live tracking and historical location data that reveal the trajectory, velocity, and patterns of movement of persons of interest
- Maximize existing infrastructure by leveraging cellular networks and surveillance towers, reducing deployment costs and setup time.
- Preempt trafficking events by alerting agents to suspicious activity before individuals reach the border, enabling proactive response.
- Enhance criminal monitoring through real-time location tracking of known offenders within a countries borders.
- Uncover networks and associations with intelligent analytics that detect individuals traveling together, converging, or operating in coordination.
- Boost team safety and coordination with Blue Force tracking that improves situational awareness of agent positions and movements.
- Deliver a unified intelligence picture by integrating location data with digital forensics, OSINT, financial transactions, criminal records, and immigration databases.
- Disrupt smuggling operations by maintaining real-time monitoring during border surges, enabling discovery of narcotics and contraband movements.

SS8 BORDER CONTROL

DETECT

Utilize existing telecom infrastructure to locate devices carried by human traffickers, smugglers, immigrants, and cartel along a country's border.

Cost-effective, expansive coverage with AI-driven analytics enables early detection of unusual activity, enhancing Border Patrol's operational reach.

MONITOR

Unique digital device signals and behavioral data are cross-referenced with known intelligence profiles to differentiate between immigrants and high-risk actors.

Advanced algorithms ensure timely identifications, minimizing errors and prioritizing threats.

CLASSIFY

AI and ML are used to analyze the digital footprints of potential threats and compare them to smuggling and trafficking behaviors.

Data fusion enhances profiling with cellular and sensor insights and devices are risk-ranked, optimizing Border Patrol resources.

TRACK

Suspected criminals can be automatically tracked in real-time, optimizing the use of an agent's time.

AI anticipates crossing points, allowing Border Patrol to allocate resources more effectively.

RESPOND

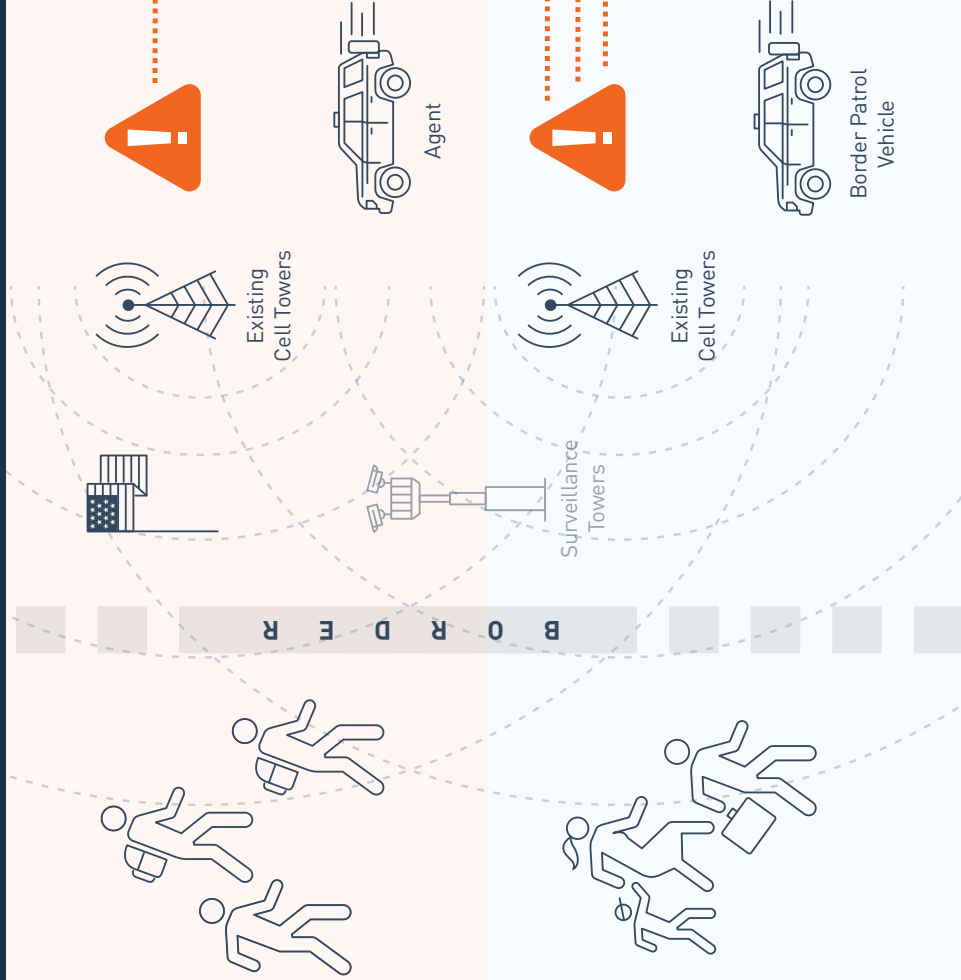

Field agents receive real-time situational awareness for swift and decisive action, improving efficiencies during critical incidents.

Instant data sharing ensures seamless coordination with partner agencies like the Drug Enforcement Administration.

RESOLVE

Comprehensive insights from integrated data enables swift action and real-time Blue Force tracking to ensure safety and coordination.

The securely stored data supports evidence collection, forensics, and prosecution for lasting impact.

We offer a comprehensive and simple way to analyze and visualize lawful intelligence data. Learn how we can help you capture data and turn it into actionable intelligence:
