

INVESTIGATION SOFTWARE FOR LAW ENFORCEMENT AND INTELLIGENCE AGENCIES

SEE WHAT MATTERS MOST.
FIND ANSWERS FASTER.

In today's digital world, the ability to intercept, visually reconstruct, and analyze digital communication is critical for intelligence investigations. Intellego XT Monitoring Center (MC) has been delivering real-time, mission-critical insight into communications for over 25 years, with AI-powered visual and audio reconstruction of voice calls, data sessions, emails, messages, and more.

Together, these features help speed up investigations into counterterrorism, organized crime, border security, drug smuggling, trafficking, and more while minimizing the IT expertise needed and maintaining evidentiary integrity for successful case resolution.

DIFFERENTIATORS

Image / Video Gallery: an integrated image and video gallery allows analysts to see all images for a case and filter by size, date, and more and correlate them with other events.

Image/Object Recognition: automated detection of relevant objects in video and image files to surface critical visual evidence.

Facial Similarity Comparisons: advanced facial matching across images and video to uncover associations and corroborate leads.

iDossier: consolidate, correlate, and contextualize various data sources into a comprehensive digital profile of a target to visualize relationships, behaviors, and activities.

Voice Analytics: translation, transcription, gender identification, key word spotting, voice diarization (automatic segmentation of speakers in a conversation), age estimation, and speaker sentiment are supported.

ePXE: SS8's proprietary Deep Packet Inspection tool extracts, classifies, and correlates protocol-level metadata for real-time and historical insight into encrypted communications.

Link Analysis Tools: visually graph the relationships, transactions, hierarchies, and communications between suspects to understand a criminal organization's structure in a single visualization.

Evidential Playlist: create, modify, and export an evidence playlist just like on your favorite music player. Select communications, photos, social posts, and more for compelling case narratives.

Threat Profiler: aggregates indicators and contextual changes over time and monitors for predefined events or conditions to maintain a current view of a subject's risk posture, enable proactive surveillance, and improve continuity across shifts and teams.

INTELLIGENCE & INVESTIGATION

Collect & Identify

All-Source Ingestion
OSINT
CAI (Commercially Available Information)
600+ Sources Available
Multi-INT Data Fusion
Cross-Domain Intelligence

Locate

Heat Map
Link Analysis
Pattern of Life
Movement Analysis
Multi-INT Correlation

Monitor

Meeting Detection
Association Mapping
Real-Time Alerts
Voice Analytics
Behavioral Anomaly Detection
Threat Profiler

Resolve

Evidence Logging
Chain-of-Custody Documentation
Audit Trail for Legal/Oversight Compliance

AI Assisted Analysis and Workflow Reporting

CAPABILITIES

SS8's secure INXT Monitoring Center offers real-time ingestion and reconstruction of large volumes of data including voice calls, emails, and other communications. It can import data from external sources such as PCAP files and provides immediate alerts when a subject of interest initiates new communication or changes location.

Customizable dashboards display multi-dimensional relationships, geolocation maps, event timelines, and image galleries to facilitate rapid retrieval and analysis of intercepted data. Intellego XT MC's powerful search engine and intelligent query language support highly flexible queries, allowing investigators to tailor their searches to specific needs to uncover actionable intelligence.

Further capabilities include real-time and historical location visualization and mapping, enabling precise tracking and surveillance of subjects, including meeting and travel notifications.

With the Intellego XT MC intelligence platform, analysts get a force multiplier that can help reduce investigative timelines from weeks to days or even hours. The AI-driven solution creates a 360-degree view of subjects, unifying intelligence, automating workflows, and creating operational advantages at every level of a case.

WHY CHOOSE SS8 NETWORKS?

- A. It is our mission to provide the most advance Lawful Intelligence solutions today, to assure a safer tomorrow.
- B. Our solutions are designed to exceed our customers' needs and help them successfully navigate the changing world of communication data.
- C. We expedite investigative results by combining and analyzing multiple data sources simultaneously, providing new levels of visibility.
- D. We are trusted by the world's leading Law Enforcement Agencies (LEAs), and CSPs because our powerful, compliant solutions deliver results.
- E. Secure and transparent, the SS8 platform offers role-based access, chain-of-custody protections, and full auditability.

Learn how we can help you make lawful and location intelligence simple, efficient, complaint, and scalable.
