

ONE PLATFORM, EVERY COMMUNICATION PROVIDER

SECURE ELECTRONIC WARRANT MANAGEMENT FOR FASTER, FULLY AUDITABLE LAWFUL INTERCEPTION

One secure platform to initiate, document, and submit warrants electronically, to every communication service provider.

SS8 eWarrant replaces paper-based, manual processes with a fast, fully traceable digital workflow for criminal investigators that minimizes fraud and human error. Each approved warrant is provisioned directly into the provider's mediation platform, which delivers results to the agency's monitoring platform, with status updates at every step.

Built on SS8's Discovery platform, SS8 eWarrant includes proven security: identity management and access control, protection of data in transit and at rest, and a secure audit trail for every action.

ONE WARRANT. EVERY CSP.

Submit eWarrants to all CSPs. Example warrant types:

 Location  Communications  Voice

IMPROVED EFFICIENCY

Digital records eliminate paper hand-offs and re-keying, minimizing human error and speeding activation. Freeing investigators to focus on casework

EASY TO USE & ACCESS

An intuitive interface guides officers through each warrant from any authorized workstation.

SAFE & SECURE

Role-based access, encryption in transit and at rest, and a secure audit trail protect every warrant.

A STREAMLINED, SECURE WARRANT LIFECYCLE

Initiate & Submit

- Guided entry with supporting documents
- Electronic submission to any communication service provider

Provision & Deliver

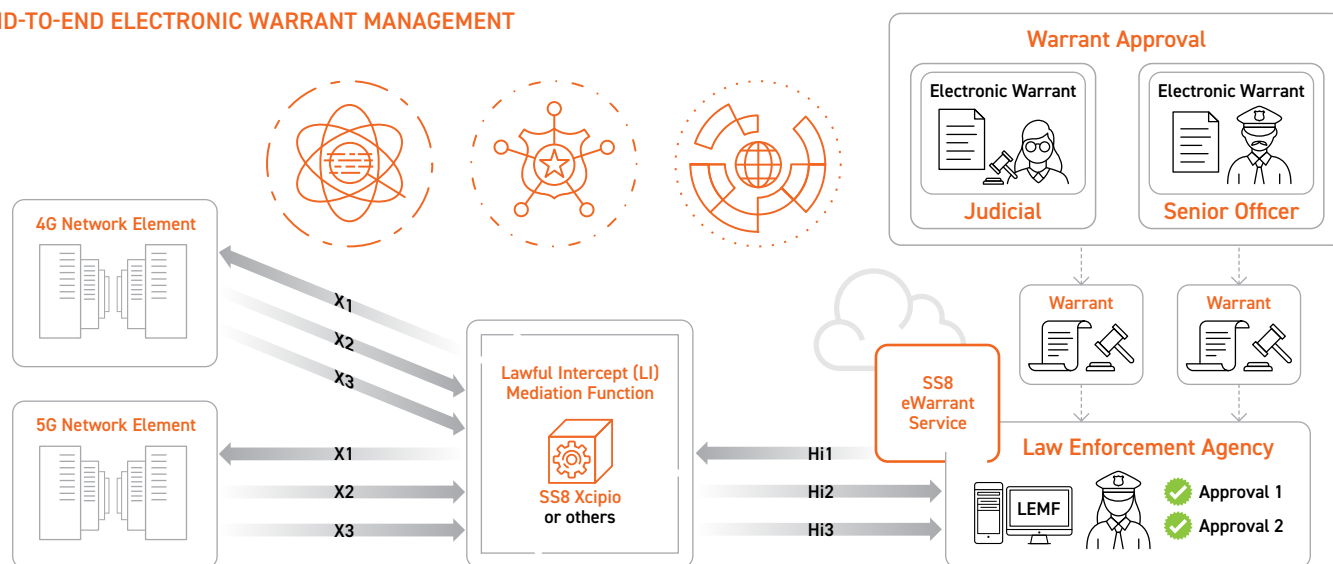

- Automatic provisioning to Xcipro Mediation
- Secure response to the agency's monitoring center

Track & Monitor

- Authorization details from the warrant
- Supporting documents in one place
- Target, LIID & delivery status updates

END-TO-END ELECTRONIC WARRANT MANAGEMENT

Once a warrant has been approved, eWarrant provisions it to a Communication Service Provider's mediation platform, which tasks 4G/5G network elements (X1) and delivers intercept-related information and content (HI2/H/3) to the agency's Discovery solution.

TRACK & MONITOR EVERY WARRANT

Monitor warrant status and receive updates as each warrant progresses.

Authorization

Information from the warrant: authorization reference, authorizer name and contact information, type of case, and more.

Supporting Documents

Signed warrant PDFs, judge's orders, and other documentation, with a count of uploaded files at a glance.

Service-Specific Information

Target information such as the LIID, status, delivery details, and more.

FEATURES:

Identity Management & Access Control

Role-based permissions and strong authentication ensure only authorized users can create, view, or act on a warrant.

Protection of Data in Transit & at Rest

Warrant data and supporting documents are encrypted as they move to the mediation platform and while they are stored.

Secure Audit Trail

Every submission, amendment, and provisioning action is time-stamped and attributed, supporting oversight and court scrutiny.

Direct Provisioning to Xcipro Mediation

Approved warrants flow straight into SS8's Xcipro platform, eliminating re-keying errors and speeding activation.

WHY CHOOSE SS& NETWORKS?

- Our lawful interception solutions are trusted by the world's largest LEAs and government intelligence agencies.
- We are the top provider of mediation and monitoring platforms in the US and UK.
- For nearly 25 years, we have evolved our solutions alongside the agencies we serve.
